 A systems integrator or system integrator is a
 person or company that specializes in bringing
 together component subsystems into a whole
 and ensuring that those subsystems function
 together, a practice known as system
 integration. They also solve problems of automation.
 And so we are left with Carbon, the most versatile,
 most adaptable most useful element of all.
 Carbon is the element of life. Silicon
 is neither metal nor non-metal it's a metalloid,
 an element that falls somewhere between
 the two. The category of metalloid is something
 of a gray area, with no firm definition
 of what fits the bill, but metalloids generally
 have properties of both metals & non metals.
